

DATABASE SYSTEMS LEARNING PROJECT

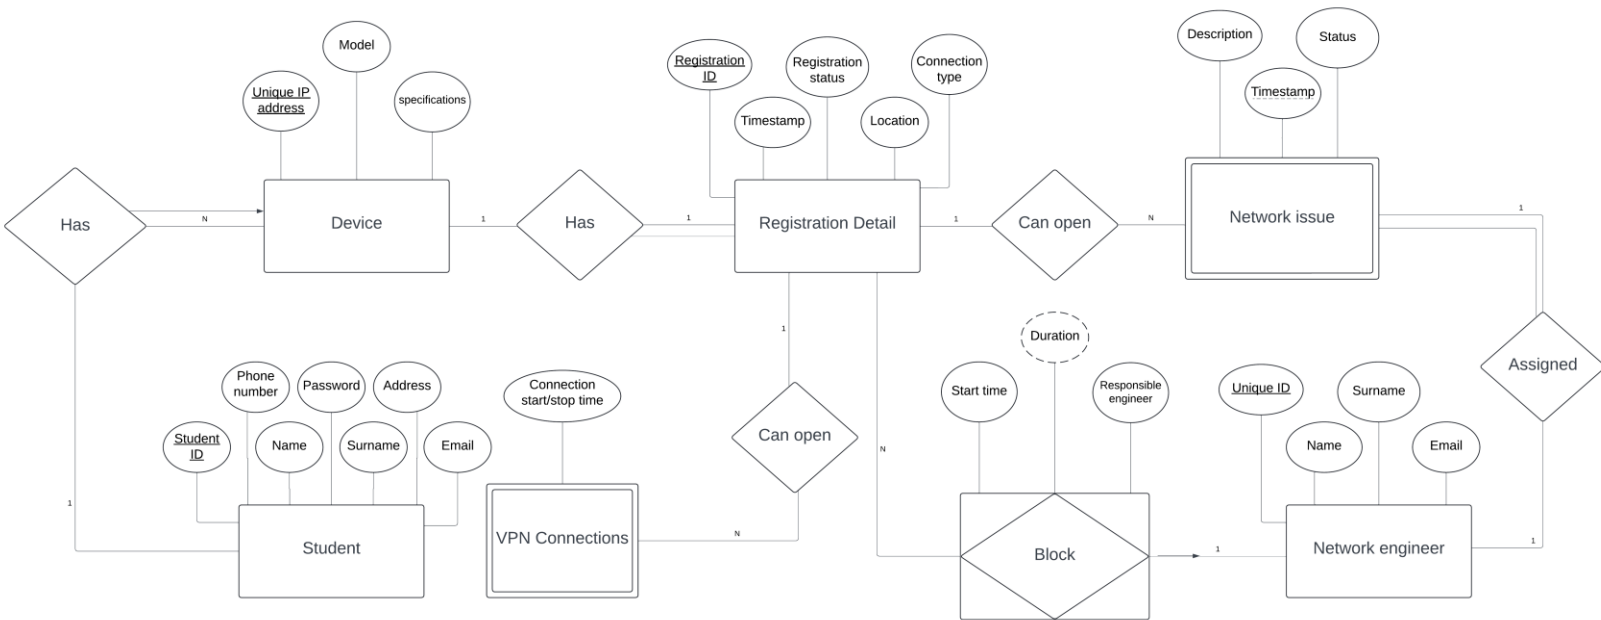

Entity-Relationship Modeling

Conceptual models for structured data requirements

CONTRIBUTORS

Barış Şan and Bora Bedirhan Uyar

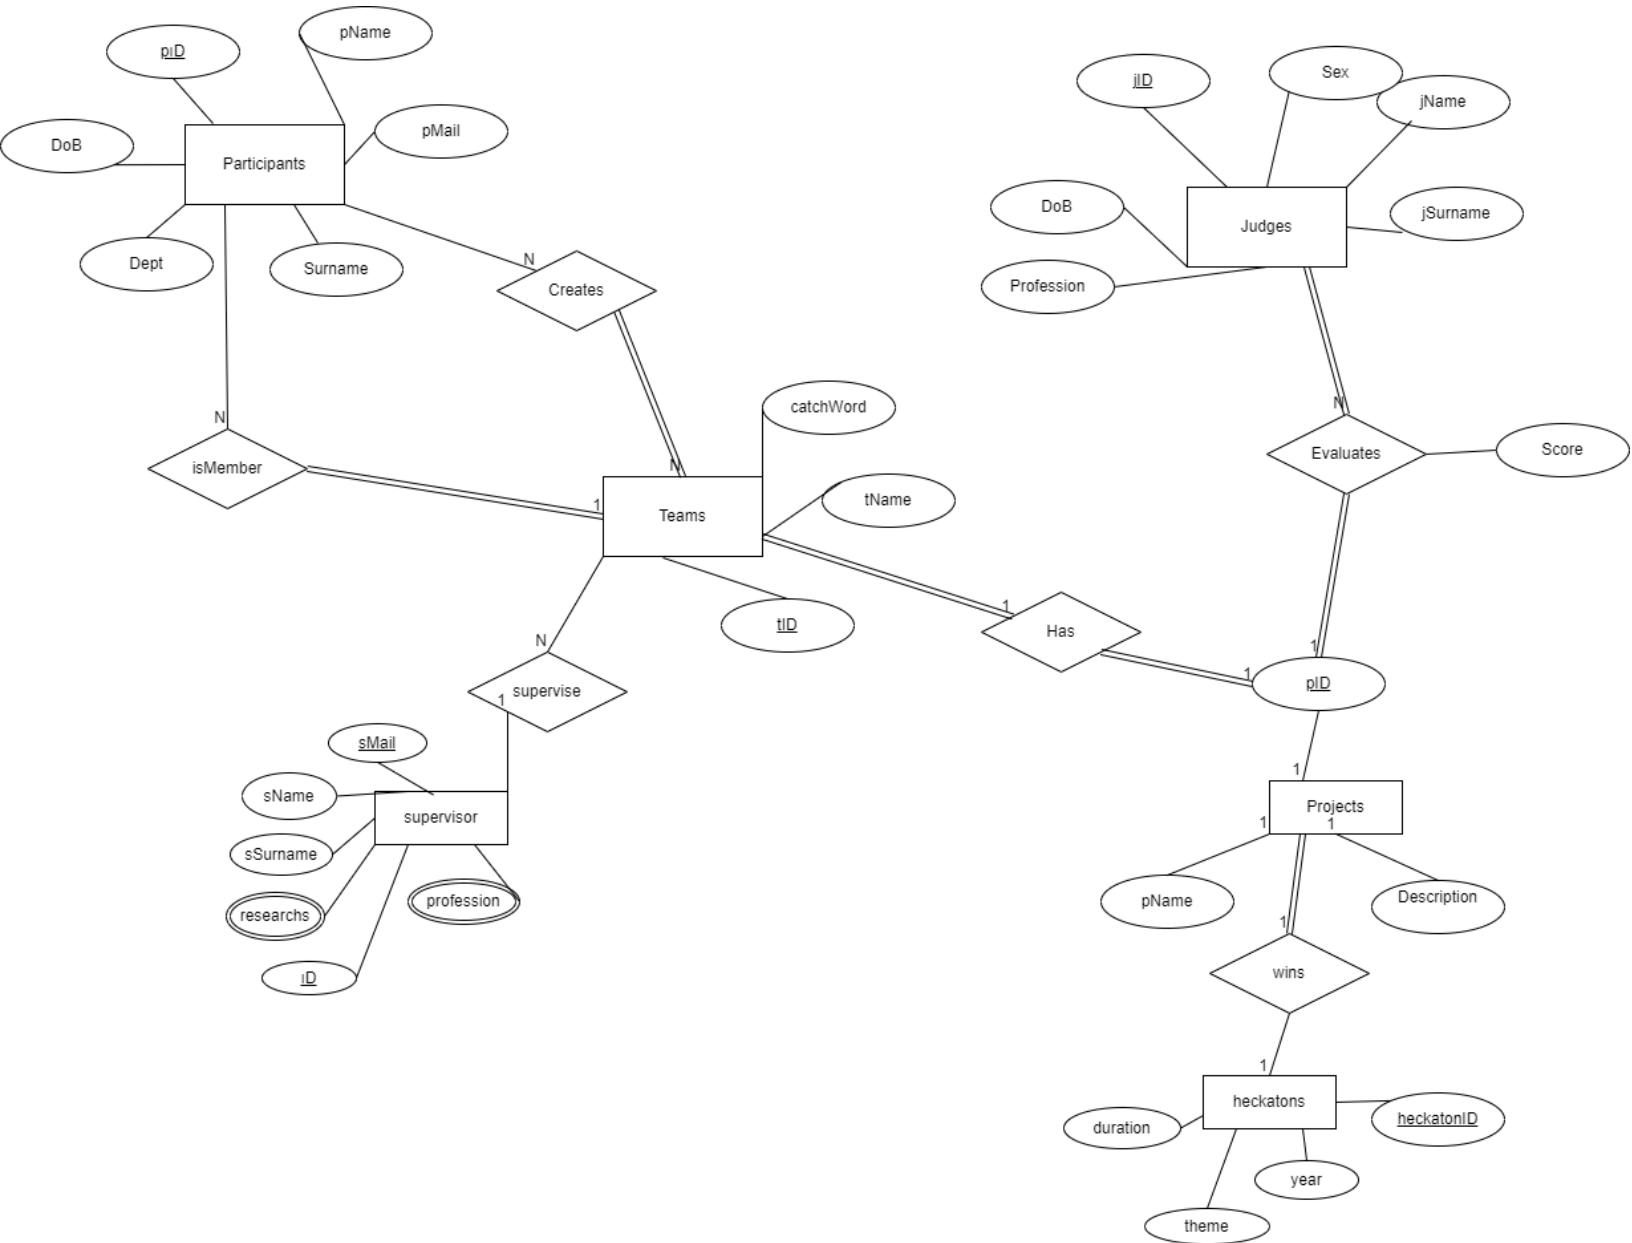

Use Case 1 – METU NetRegister

Assumptions:

- We didn't make any assumptions in this case.

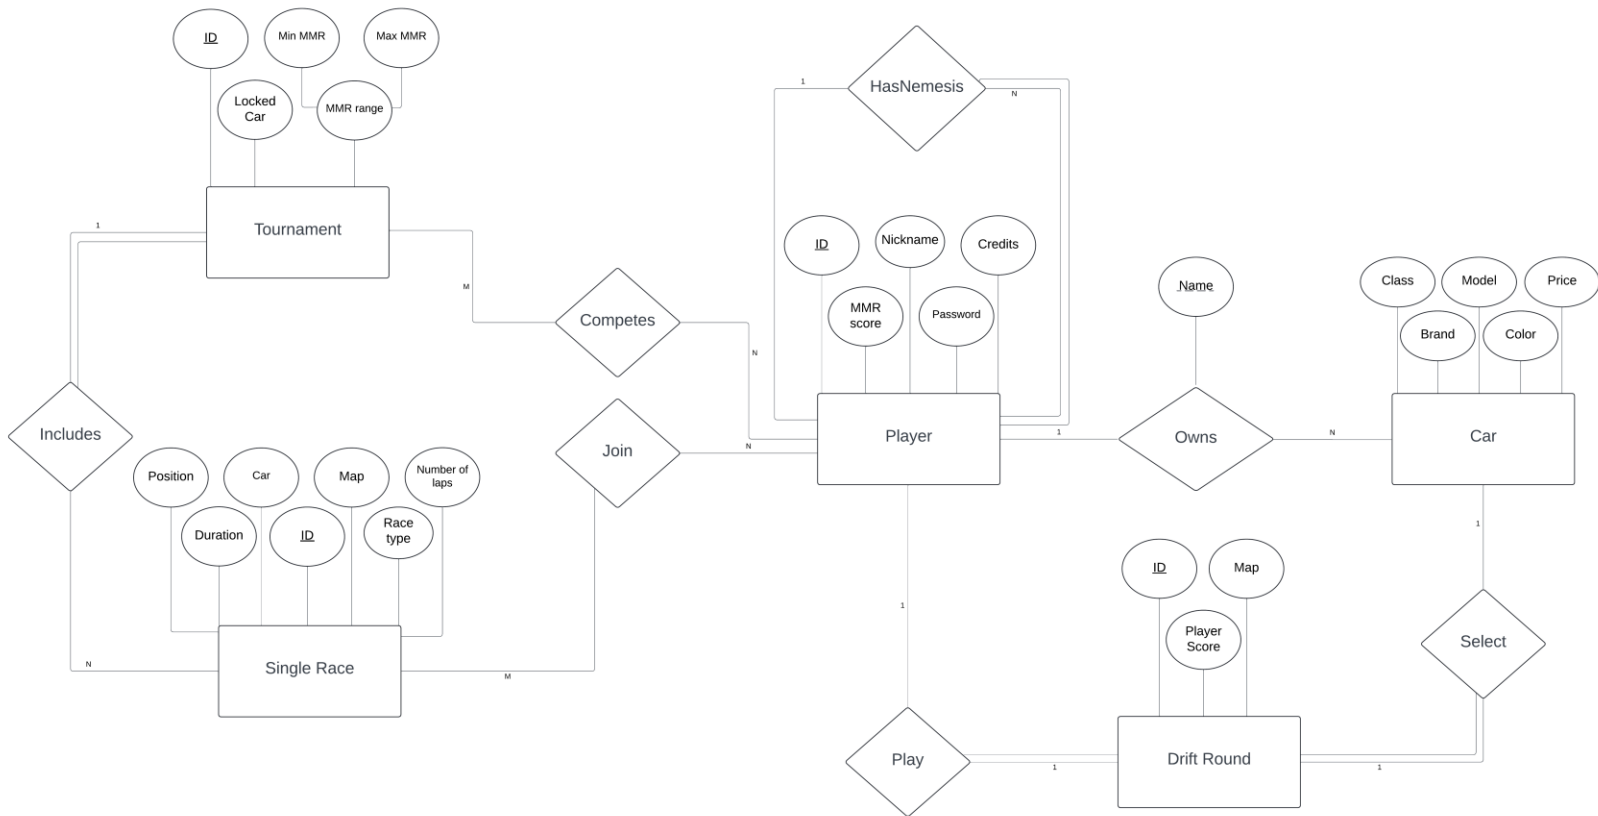

Use Case 2 – ACM Fest Management System

Assumptions:

- teams could not reuse project names so instead of project name being primary key, we add project Id for primary key.

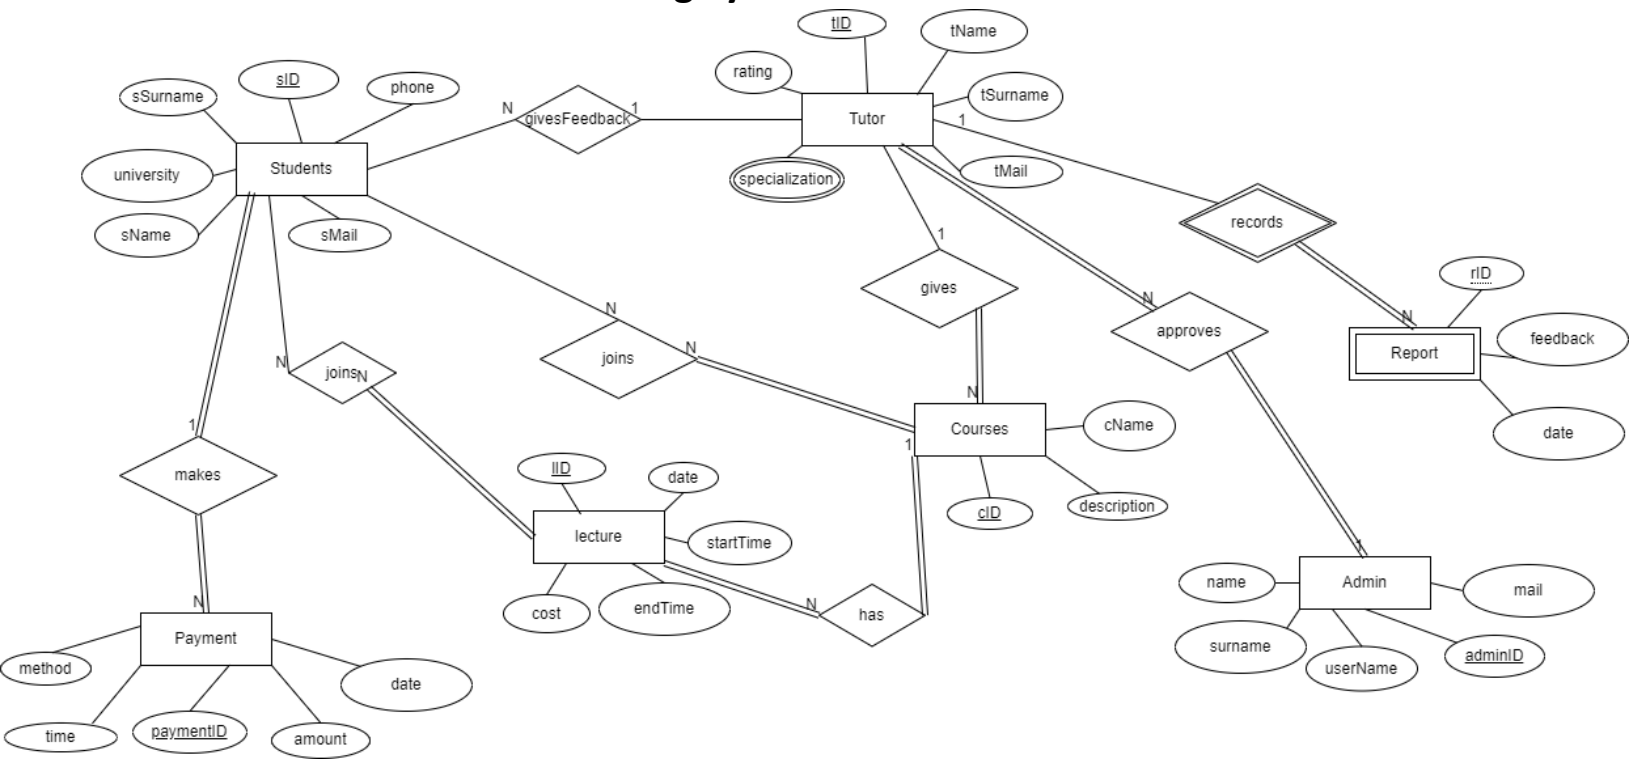

Use Case 3 – Desire for Velocity

Assumptions:

- We assumed car objects that own by players and showed in store are same.
- We assumed player quotes are taken and show automatically.

Use Case 4 – Online Tutoring System

Assumptions:

- tutor can have many specializations.
